### **Report: Internationaler Referee course WMAC 2014**

The International Referee course Sat & Sun 1.2.14 2.2.14 in Bregenz was a complete success as in the past 3 years. There were 31 judges from 4 countries to Bregenz.

This course is an important milestone in the field referee and tournament management.

There were the following areas:

- Rules knowledge
- Assistive
- Tournament schedule
- Practical units of all sections

taught over a period of 2 days. Very interesting was the fact that 5 A1 judge with the International licenses were on site.

Course leader had Harald Folladori and Robert Thier . Speakers were in the areas of shapes and ring sport as Efisio Prasciolu and Alberto Tedoldi . Through technology and organization led Daniela knocker and Pättrick Aichner .

The course set new standards in the training of judges as the practical units over 60 % share and had a so-called stress test ( simulation of a tournament and fight competitions ) was carried out at the International Referees much to the enthusiasm of the participants.

It was here the first time limits and recognized and set the team skills to the fore .

The NEW and OLD International referees went with a lot of ideas from this course and confirmed the direction way in martial arts = evaluate , protect , but to make a difference , not prevent - for the sport !

The organizer , the Vorarlberg State trade association with the club KSU Black Dragon of the NMAC Austria set 6 fighters over 2 days available (range KB) , and Gerold Bauer with a fighter of the area Grappling Strike supported very strong.

At the end there was still a nice present for all ( WMAC clock ) and the badge of the International Judges .

Thank you to those responsible , and thanks to all who have not spared the long way .

With sportly regards,

**Harald Folladori**
